

**NOTICE OF PROJECT COMMENCEMENT
TRUNK SANITARY SEWER EXTENSION ON LAKESHORE
AND PINEWOOD PARK DRIVES
MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT STUDY**

PURPOSE:

The City of North Bay has retained **exp (Trow)** to develop an extension to their existing sewer system. The purpose of this work is to provide service to the South end of the City, which is currently underserved. This new sewer will be located on Lakeshore Drive and Pinewood Park Drive, from Sunset Park Public School to approximately Decaire Road. Work will include the installation of a main trunk sewer and associated appurtenances, service connections to the property lines of all existing properties along this route, as well as restoration. To determine the location of these services, existing developments will be consulted on an individual basis. Due to the nature of the work, traffic may be affected.

PLANNING PROCESS:

This project is being planned under the Schedule A+ category of the Municipal Class Environmental Assessment (October 2000, as amended September 2007). The purpose of the Environmental Assessment is to evaluate the problem, develop alternate solutions, assess the impacts of these solutions, and develop mitigation measures for the identified impacts. A major component of all Class Environmental Assessments is public consultation. The consultation process will include this written notice, discussions with affected property owners as well as consultation with applicable agencies, ministries, and interest groups. As a Schedule A+ project, this sewer extension work is pre-approved subject to public notification.

If you have any questions or concerns, please contact the consultant's staff at any time. For additional information regarding this project or you wish to have your name added to the mailing list please contact **exp** or the City of North Bay.
